

Project Demo Planning

Date	15 JULY 2026
Team ID	
Project Name	AI-Based Credit Card Approval Prediction System
Maximum Marks	1Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the problem of manual credit card approval and explain project objectives.	2	Ch Bhuwin Rag
2	Dataset & Data Preprocessing	Explain dataset, feature engineering, preprocessing techniques, and data preparation.	3	Jhari Shanmukha Lasya Nallamalli
3	Machine Learning Models	Describe Logistic Regression, Decision Tree, Random Forest, XGBoost, model evaluation, and best model selection.	4	Naga Venkata Sahithi Parepalli
4	Live Web Application Demonstration	Demonstrate the Flask application, user input, and real-time approval prediction.	4	Huda Mehreen
5	IBM Watson Deployment	Demonstrate cloud deployment, explain IBM Watson integration, and discuss project benefits.	2	Sneha Deepika Ragola
6	Conclusion & Q&A	Summarize the project, discuss future enhancements, and answer evaluator questions.	3	All Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenges of manual credit card approval and the need for automation.
2	Solution Overview	Describe the complete system architecture, workflow, technologies used, and machine learning pipeline.
3	Live Feature Demonstration	Show the web application by entering applicant details, predicting approval/rejection, and explaining the output. Also demonstrate IBM Watson cloud deployment if available.
4	Q&A Session	Answer questions related to dataset, algorithms, Flask integration, IBM Watson deployment, evaluation metrics, scalability, and future improvements.
